

STRATEGIC OVERVIEW

Our Company: LML Corp. is a premier Woman-Owned Small Business (WOSB) that specializes in procurement of consumer products along with manufacturing, distributing, and warehousing of various products across multiple industries.

LML CORP/ Core Competencies

- Items (all with FDA certificate)
- 1. KN95 Mask – Respiratory equipment removes 95% of ppm particles and microorganisms and additionally protects from liquid and airborne particle transfer.
- 2. Surgical Mask- Procedural ear loop mask prevents mists, sprays, bodily fluids, and particulate matter from entering nose and lungs.
- 3. Tyvek Suit – 1. Antivirus protective clothing suit – KC Certification protection against contamination, hazardous substances fumes and chemicals. Alternative 2: Antivirus protective clothing suit – BSA, FDA, CE, COC Certified – disposable protection suit superior barrier protection against a broad range of hazards.
- 4. Gown – Cardinal Health Gowns – NIOSH Approved – AAMI Level 1-4 Gowns – Water-resistant, Impact penetration, hydrostatic pressure (AATCC 27, 42,127) ASTM F 1671
- 5. Goggle – Protective KC Certification, splash shield, clear anti-fog.
- 6. Face Shield – Intco Full Length Face Shield, lightweight antifog protection from splashing and spraying optically clear polyester
- 7. Infrared Temperature Reader – Advanced Infrared temperature reader for instantaneous display of temperature.
- 8. IPA- Isopropyl alcohol for use formulating sanitizers and disinfectants.
- 9. Ethanol- Specially denatured ethanol for use in formulating disinfectants and sanitizers.
- 10. Hand Sanitizer in Bulk and bottle: All purpose disinfectant and sanitizer available in bulk shipments or squeeze or pump bottles of 2oz, 4oz, 6oz, 16oz ½ gallon and 1 gallon.
- 11. COVID Test Kit:- GenBody COVID-19 IgM/IgG device is a chromatographic immunoassay kit for the rapid and differential detection of immunoglobulin M (IgM) and immunoglobulin G (IgG) against COVID-19 using serum, plasma and whole blood.

•EXPLANATION OF THE TEST

- The recombinant COVID-19 antigen was coated on the membrane and anti-human IgM and IgG monoclonal antibody was conjugated the gold particles, respectively. When the specimen existing anti-COVID-19 antibodies is loaded into a sample well (S), the antibodies are complexed with anti-human IgM (or IgG) gold conjugate. And this complex migrates and captured by the immobilized recombinant COVID-19 antigens to make a visible band in the test line regions, M and G. The solution continues to migrate to the control line (C) region that binds a control conjugate, thereby producing another red line. GenBody COVID-19 IgM/IgG can detect the antibodies against COVID-19, so that the device is suitable for the diagnosis of COVID-19 infections.
- 12. Surgical Gloves (Nitrile) Powder-Free and FDA Registered.
- 13 Midwest Distributor of (WWW.CLEANALLCNY.COM) PRODUCTS

LML CORP (PROCUREMENT SOLUTION PROVIDERS)

Past Performance and Differentiators:

LML Corp. has provided manufacturing, distributing, and warehousing of consumer products to a multitude of markets such as retail grocery store chains, wholesale distributors, foodservice, club stores, hospitality, and travel. LML Corp. has an extensive library of product formulas but can also tailor/customize to customer requirements or formulas. We also have the current capacity and expansion capabilities for private labeling, co-packing, cold storage, and warehousing for the clients needs. LML Corp. is specialized in the PPE industry.
